

# BRICK PRODUCTS Nuclear and Medical Radiation Shielding

Alchemy's brick products are available in **FLAT** and **INTERLOCKING "V"** type as our standard. The interlocking type provides better elimination of radiation leakage and creates sturdier walls with less chance of toppling. Interlocking types are easier to erect, modify and relocate walls and cells of any size. Please specify whether you want Pure Lead or Hi-Hard Bricks. For your convenience we have indicated the Imperial sizes in blue and the metric equivalent sizes in red. Bricks are also ideal as counterweights.
